receipt of an executed Notice to Proceed instruction from the County.

The County may, when changes are minor or when changes would result in relatively small changes in the Fee or Contract Time, elect to postpone the issuance of a Contract amendment until such time that a single amendment of substantial importance can be issued incorporating several changes. In such cases, the County shall indicate this intent in a written notice to the Contractor.

- 2) The County shall fix the total lump sum value of the amendment in the work of the Contractor, and shall set out the price which shall be added to or deducted from the Fees.

The Contractor shall, when required by the County, furnish to the County an itemized breakdown of the quantities and prices used in computing the value of any change that might be ordered.

16. PAYMENTS AND COMPLETION:

This schedule, when approved by the Administrator, shall be used only as a basis for the Contractor's application for payment.

b. Certificate for Payments. If the Contractor has made application for payment as above, the Contract Practical Representative will validate the application for such amount as is determined to be properly due, or state in writing the itemized and specific reasons for withholding an application as provided herein. After the Administrator has validated the application for payment, the County shall pay to the Contractor, within thirty (30) days, the amount covering services or work performed or completed. No application for payment, nor any payment, shall constitute an acceptance of any work or service not in accordance with the Contract Documents.

c. Failure of Payment. If the Contract Practical Representative should fail to approve an application for payment, through no fault of the Contractor, within seven (7) days after receipt from the Contractor, or if the County should fail to pay the Contractor within thirty (30) days after receipt of the Contract Practical Representative's approval for Payment, then the Contractor shall receive interest on the balance due with the interest being one percent (1%) per month not to exceed three (3) months (3%). ENGINEERING SERVICES FOR DRAINAGE BASIN CONCEPT PLANNING GOLDEN ISLES PARKWAY

SECTION C

PROGRAM SERVICES

1.0 STATEMENT OF WORK

TASK 001 STUDY OF CURRENT CONDITIONS

Study and evaluation of the performance of the existing storm drainage infrastructure serving the study area. A detailed study is not needed for the portions of the study area that are not currently draining via established infrastructure. The study will include flood elevations due to riverine flooding and backwater analysis from the tidal area if applicable. The backwater analysis will take into account a combination of riverine flooding during a higher than normal conditions (higher than normal tides in conjunction with river at flood stage). The study shall be reviewed by Glynn County at the 50% completion, and 100% completion stages.

TASK 002 ALTERNATIVE ANALYSIS

Based on existing and available data (proofed by field survey as needed) along with field surveys of areas; the Study Area should be evaluated to provide an alternatives analysis. The alternative analysis should reflect how new infrastructure could be installed or existing infrastructure enhanced in order to provide the “backbone” for drainage in the Study Area when it is built out (as considered in the County’s Future Land Use Plan). Outfalls to the river will have to consider the effects of the river in flood stage on the balance of the system.

Alternatives should be clearly identified and comparative criteria should be established for a decision-making basis including items such as cost, availability, phasing, maintenance, multiple/recreational use, regional solutions, water quality enhancements, downstream improvement of existing flow conditions, permitting constraints, and the like. Recommendations should be included as part of the report.

The alternatives shall be reviewed by Glynn County at the 25% completion, 75% and 100% completion stages.

County Staff will review the final alternatives with input from the public, property owners, regulators, the consultant, and the like. An alternative will be selected to move forward with.

TASK 003 CONCEPT DESIGN

A concept design will be prepared based on the alternative selected from Task 002. The concept modeling must satisfy the requirements section listed in “General Conditions”. The concept modeling shall include design sizing for the storm drainage infrastructure in the project area as well as concept drainage basins, and concept development coverages. The concept modeling should also include details of assumptions used to prepare the study. The report will include flood levels based on flow conditions as used in Task 001. As a separate item, the effects of storms surge impacts considered and if possible addressed.

The report shall be reviewed by Glynn County at the 50% completion, and 100% completion stages.
