## **JWSC Sea Palms Piping Work**

The Brunswick – Glynn County Joint Water and Sewer Commission (JWSC) will begin a piping rehabilitation project within the Sea Palms community beginning Monday, April 6, 2020. The JWSC will perform video inspections, clean, and use cured in place piping (CIPP) add a liner to 8,464 linear feet of eight inch sewer line in order to extend the life of the lines. The CIPP process allows much of the piping to be improved without excavating the line, however, during this work intermittent lane closures will be necessary through the life of the project which is expected to take about four months.
